QMI Security Solutions on Extreme Makeover: Home Edition

QMI Security Solutions provided rolling security shutters for the Harris family on episode 6 of ABC's Extreme Makeover: Home Edition. QMI donated over \$20,000 in product and volunteered the services of several employees to install the rolling shutters.

QMI worked with Extreme makeover's Constance Ramos to select the best products and controls for Alice Harris' home. Constance selected the AL5-E single wall extruded aluminum slat. Furthermore, it was decided to use a punched pattern to allow for visibility and ventilation.

QMI premiered its decorative box housings for the show. Constance loved the creative ability the decorative box housings gave her to make the coil cover a design element of the home. The decorative box housing not only served to unify the rolling shutters into the overall aesthetic but also enhanced the home's exterior beauty.

Electric controls were used for the front room, kitchen, and rear den. The electric shutters were wired with a battery backup system in case of power outages, emergencies, or brown outs. Strap operators were used in the bedroom and were equipped with QMI's patent pending quick release system for emergency egress.

QMI Security Solutions is the largest manufacturer of rolling shutters for security and hurricane protection in North America. For further information, call (800) 446-2500 or visit us online at www.qmiusa.com.
